

**This fall, the Ninth e-train<sup>1</sup> Conference will be held October 7<sup>th</sup> in Bowling Green, KY. The conference is cosponsored by the President's office at WKU and The Green River Regional Educational Consortium.**

**You are invited to submit a proposal to present at the  
Ninth e-train Conference.**

President Ransdell and Dean Evans have been invited and have agreed to participate in the conference. College deans, P-12 superintendents, and local school principals have also been invited.

Proposals for presentations are invited from participants with interest in Information Technology and Teacher Education. Consideration will be given to proposals about innovative or exemplary use of technology in instruction and/or research on the use of technology in instruction.

The Deadline for receipt of proposals is August 11<sup>th</sup> and you will be notified about your proposal no later than September 8<sup>th</sup>. Information about conference registration will be distributed soon.

Topics of interest include:

- Assessment and E-Folios
- Digital Imaging
- Digital Storytelling
- Distance/Flexible Education
- Evaluation and Research
- Faculty Development
- Information Technology Diffusion/Integration
- New Possibilities with Educational Technologies
- Video/Video Production
- WEB/Learning Communities
- Special Education/Assistive Technology

**To learn more about e-train, please go to [www.etrainexpress.com](http://www.etrainexpress.com).**

E-train is a Federally funded Western Kentucky University (WKU) project designed to help current and future teachers make better use of technology in their instruction. Participants in the project, called e-train advocates, come from every department on Western's campus and from many P-12 schools. Advocates work in teams to learn about and develop ways to use technology in instruction. Advocates have presented the results of these efforts in many venues, including international, national, state, and local conferences; television and radio shows; and publications. E-train sponsored conferences have been one method for sharing ways to use technology in instruction.
